COHEN ROSALES

SENIOR SOFTWARE ENGINEER

PROFILE

I'm a dedicated software engineer with a deep passion for coding that started in my early years. With expertise in both frontend and full-stack development, I've worked with a variety of companies, ranging from innovative startups to established organizations. My experience covers the full spectrum of web development, from conceptual design and architecture to successful deployment, consistently delivering scalable and high-quality solutions.

WORK EXPERIENCE

Seattle

12/2021- 07/2024

Senior Full stack Engineer

- Built and Sustained High-Traffic Websites: Developed and maintained high-traffic websites using WordPress and the MERN stack, focusing on scalability and peak performance.
- Team Leadership: Led a team of 5 developers, managing the entire project lifecycle with a commitment to quality and on-time delivery.
- Cross-Functional Collaboration: Worked closely with cross-functional teams to deliver top-tier software, ensuring adherence to best practices in both coding and design.

Tain

01/2018 - 10/2021

Senior Frontend Developer

- Collaborative Development: Worked alongside senior developers and team members on various projects, gaining valuable experience and enhancing project outcomes through effective teamwork.
- Feature Implementation: Collaborated with product managers and designers to introduce new features like user authentication and data visualization, boosting web application functionality and user satisfaction.
- UI/UX Enhancement: Applied advanced UI/UX strategies to create user-friendly interfaces, resulting in significant improvements in user engagement and overall satisfaction.

SafetyCulture

Junior Web Developer

02/2016- 12/2017

- Full-Stack Web Development: Developed and sustained web applications using JavaScript, PHP, and Laravel, providing comprehensive solutions customized to meet client needs.
- Backend Development: Designed and optimized backend services with PHP and Laravel, ensuring seamless integration and efficient communication with front-end components.
- Database Management: Optimized and managed databases for effective data storage and retrieval, improving overall application performance and stability.
