PROFILE

I'm a dedicated software engineer with a passion for coding that started in grade school. Specializing in frontend and full-stack development, I've worked with a variety of companies, from innovative startups to established enterprises. My experience has equipped me with a comprehensive understanding of the entire web development process, from conceptual architecture to successful deployment.

WORK EXPERIENCE

Dotsub   12/2021- 06/2024
Senior Full stack Engineer

- Led a team of 7 developers, managing the end-to-end delivery of projects with a focus on quality and timeliness.
- Developed and maintained high-traffic websites using Shopify, WordPress, MERN stack ensuring scalability and performance.
- Performance Optimization: Implemented efficient coding practices and leveraged modern tools to optimize website performance, achieving faster load times and better user retention.

Fauget Studio   01/2018 - 10/2021
Senior Frontend Developer

- User Experience Enhancement: Applied advanced UI/UX principles to create user-friendly interfaces, resulting in significant improvements in user engagement and satisfaction.
- Feature Integration: Worked closely with product managers and designers to integrate new features, such as user authentication and data visualization, into the company's web applications, increasing functionality and user satisfaction.
- Collaborative Projects: Worked closely with senior developers and other team members on various projects, gaining valuable experience and improving overall project outcomes through teamwork.

Studio Shodwe
Junior Web Developer   02/2016- 12/2017

- Web Development: Developed and maintained web applications using JavaScript, PHP, and Laravel, delivering comprehensive full-stack solutions that met client needs.
- Backend Integration: Implemented and optimized backend services using PHP and Laravel, ensuring seamless data flow and integration with front-end components.
- Database Management: Managed and optimized databases to ensure efficient data storage and retrieval, improving overall application performance and reliability.
